2024 Best New Product at the PGA Show

The team behind Skim Turf

We're OPTIDATA - software experts with 20+ years of experience in creating innovative solutions for a wide range of industries including retail, manufacturing, sports management and logistics.

Based in Cracow, one of Europe's leading IT hubs, we've been able to reach and maintain the position of an industry leader for two decades, earning us recognition and cooperation with many high-profile clients like Heineken, Ferrero, Colgate and others.

Now, we are combining the years of expertise in IT with our love for golf. After years of intense R&D efforts, we're introducing Skim Turf Management - a unique tool for real-time, in-depth analysis of your entire golf course, to achieve perfect turf condition and provide the experiences your members deserve.

One Platform to Optimize Turf Management

A completely unique solution

received the PGA Show
Best New Product 2024 Award

Automated diagnostics of the whole golf course:

- real time access to data and action points,
- frequent data collection,
- data accuracy exceeding 80%,
- a wide variety of metrics, ranging from soil moisture and vegetation, to precise nutrient measurements including minerals like potassium, phosphorus, nitrogen, and others.

Ease-of-use:

- easy to understand, user-friendly design,
- integration of data - all the important metrics available in one place,
- actionable insights - data visualizations and easy-to-read reports allow for concrete actions,
- fully functional mobile version - use skim wherever you go!

Manage your golf course proactively and with precision:

- quick reaction - anticipate and solve issues before they escalate,
- increase efficiency and make savings by focusing labor and resources where they're most needed,
- enhance member experience by maintaining top-notch turf condition.
