

Fertilis Speed® 18-5-8(+3)

Microgranular Fertilizers

NPK complex fertilizer with emphasis on nitrogen for spring and summer application to promote growth and a quick green-up.

- Formulation rich in nitrogen
- Immediately effective nutrients for targeted applications
- Very fine granule size for uniform distribution
- Dissolves completely after only short irrigation or little rainfall
- With *Bacillus subtilis*, selection E4-CDX®, to promote root growth and vitality
- Optimally suited for integrated pest management (IPM) through preventive grass reinforcement

Description

Fertilis Speed® is an extra fine granulated NPK complex fertilizer with emphasis on nitrogen, low in chloride with the ideal NPK composition for turf. Best suitable for spring and summer applications. In addition, *Bacillus subtilis*, selection E4-CDX®, promotes root growth and vitality, strengthens the plant and makes it resistant. Due to its very fine granulation (0,5-1,4 mm), this product is well designed for any high-value turf like golf and bowling greens, golf tees and stadium sport fields.

Declaration

NPK fertilizer with magnesium and sulfur 18-5-8(+3+12), with iron, manganese and zinc.

For use in horticulture.

Poor in chloride.

Content	Nutrients	
18,0%	N	total nitrogen 4,0% nitrate nitrogen 12,5% ammonium nitrogen 1,5% isobutylidenediurea
5,0%	P ₂ O ₅	neutral ammon citrate and water soluble phosphate 4,0% water soluble phosphate
8,0%	K ₂ O	water soluble potassium oxide
3,0%	MgO	total magnesium oxide 2,4% water soluble magnesium oxide
12,0%	S	total sulfur 11,0% water soluble sulfur
0,4%	Fe	iron
0,05%	Mn	manganese
0,02%	Zn	zinc

Application Recommendations

Golf Turf

Intended application

Soil application

Application frequency

1-3 per year

Application rate

Greens, pre-greens and tees

15–35 kg/ha

Time of application

Follow regional recommendation

Form of Delivery

- 25 kg bag

Transport & Storage Recommendations

Transport

- Delivery as loose goods in big bags or on pallets with bags and canisters.
- Protect loose goods from moisture during transport.
- Protect goods from excessive direct sunlight and large temperature fluctuations during transport.
- Only transport fertilizer at moderate temperatures. Use an air-conditioned lorry if necessary.
- Take note of any hazardous material labels on the product.

Storage general

- Protect stored fertilizer from frost, light, and moisture.
- Store loose goods inside a building and not in outdoor areas. Keep doors closed and cover heaped materials.
- As the product has a tendency to attract moisture, protect it from rain and standing water.
- Take note of the hazardous material labels on the product where appropriate.
- Avoid stacking more than two pallets on top of each other. Always cover loose goods and do not offload in the rain.
- Only transport and store at temperatures between 5 °C and 40 °C. Only store in the original packaging. Products should be used up as quickly as possible once opened.

Storage temperature

- Avoid frost and excessively high temperatures.
- Avoid large temperature fluctuations during storage.

Storage periode

- Products should be used up as quickly as possible once opened.
