

# Fertilis Swing® NK 8-0-24(+5,5)

## Microgranular Fertilizers

NK complex fertilizer with emphasis on potassium for autumn application to promote frost resistance and a better re-start in spring.

- Potassium-based formulation
- Immediately effective nutrients for targeted applications
- Very fine granule size for uniform distribution
- Dissolves completely after only short irrigation or little rainfall
- With *Bacillus subtilis*, selection E4-CDX®, to promote root growth and vitality
- Optimally suited for integrated pest management (IPM) through preventive grass reinforcement

## Description

Fertilis Swing® NK is an extra fine granulated, highly soluble complete green fertilizer with high potassium formulation. Particularly suitable for summer and autumn fertilization. The powerful beneficial bacterium *Bacillus subtilis*, selection E4-CDX®, promotes vital root growth and increases the resistance of turf. For golf greens, tees and other valuable turf.

## Declaration

NK fertilizer containing magnesium and sulfur trioxide 8-0-24(+5,5+36), with iron, manganese and zinc.

For use in horticulture.

Poor in chloride.

Content	Nutrients	
8,0%	N	total nitrogen 2,0% nitrate nitrogen 4,5% ammonium nitrogen 1,5% isobutylidenediurea
24,0%	K <sub>2</sub> O	water soluble potassium oxide
5,5%	MgO	total magnesium oxide 4,5% water soluble magnesium oxide
36,0%	SO <sub>3</sub>	total sulfur trioxide 35,0% water soluble water soluble sulfur trioxide
1,000%	Fe	iron
0,100%	Mn	manganese
0,020%	Zn	zinc

More information on the national declaration can be found on the respective country sub-websites.

## Application Recommendations

### Golf Turf

Intended application

Soil application

Application rate

**Greens, pre-greens and tees**

15–35 kg/ha

Application frequency

1-3 per year

Time of application

Follow regional recommendation

## Form of Delivery

- 25 kg bag

## Transport & Storage Recommendations

### Transport

- Delivery as loose goods in big bags or on pallets with bags and canisters.
- Protect loose goods from moisture during transport.
- Protect goods from excessive direct sunlight and large temperature fluctuations during transport.
- Only transport fertilizer at moderate temperatures. Use an air-conditioned lorry if necessary.
- Take note of any hazardous material labels on the product.

### Storage general

- Protect stored fertilizer from frost, light, and moisture.
- Store loose goods inside a building and not in outdoor areas. Keep doors closed and cover heaped materials.
- As the product has a tendency to attract moisture, protect it from rain and standing water.
- Take note of the hazardous material labels on the product where appropriate.
- Avoid stacking more than two pallets on top of each other. Always cover loose goods and do not offload in the rain.
- Only transport and store at temperatures between 5 °C and 40 °C. Only store in the original packaging. Products should be used up as quickly as possible once opened.

### **Storage temperature**

- Avoid frost and excessively high temperatures.
- Avoid large temperature fluctuations during storage.

### **Storage periode**

- Products should be used up as quickly as possible once opened.
